- ¹ Specifications S1-S7 include Tremulant affecting pipework of the specification. Pipework of these specifications will be under expression. Installation requirements will vary according to the particular situation.
- ² Voix Celestes may include notes 1-12 if available from organ resources.
- ³ Specifications xM include the lowest 5 pipes of the Open Diapason. Appropriate chamber or casework accommodation is required.
- ⁴ Specifications including a Horizontal Trumpet require appropriate casework or custom configuration.
- ⁵ Partial installations of these specifications, i.e. "prepared-fors", can be undertaken. While this will ultimately result in a greater cost than if the specification is installed complete, some saving will result if the chestwork for the desired specification is supplied at one time.
